

Solar or Cord Pull 3 LED Torch

L/H 3LEDPULL

FLASHLIGHT OPERATION

1. Push switch up on left hand side to light the 3 LEDs.
2. Push switch down to turn off the LEDs.

CHARGING YOUR TORCH - SOLAR OPERATION

Switch the power off. Face the solar panel towards the light source to collect light and begin the charging process.

Attention: This product is designed to be charged under any indoor or outdoor environment where there is a light source, however, for the best charging status, exposure to sunlight is recommended.

MECHANICAL OPERATION - CORD PULL

1. Switch the power off.
2. Grip the ring with your fingers and pull.
3. Stop pulling and release when the length of cord comes to about 70 - 80cm.
4. Continue pulling the cord for 1-2 mins.
5. Place the ring back in the product to complete charging.

Attention: Avoid hard or sudden pulling while charging. An interval of 5 mins is recommended when the cord has been pulled over 200 times in 4 mins, this will prevent the product overheating.

ATTENTION!

1. Switch the power off when not in use.
2. Avoid shining the beam directly into peoples eyes.
3. Protect the solar panel from being struck by hard objects or dropping on the ground.
4. Keep the solar panel clean for maximum efficiency.
5. Always ensure the torch is switched off when not in use or being recharged using the solar panel.

BATTERY REPLACEMENT

1. Twist the battery compartment cover counterclockwise by using a coin to open.
2. Insert the battery into the compartment with the negative side downwards/positive upwards.
3. Place the cover back and tighten up with a coin.

BATTERY TYPE

Rechargeable Lithium LR2450, 3.6v 110Ah
