2. Press again to switch off the LEDs

CHARGING YOUR TORCH

SOLAR OPERATION

Face the solar panel towards the light source to collect light and begin the charging process

Attention: *This product is designed to be charged under any indoor or outdoor environment where there is a light source, however, for the best charging status, exposure to sunlight is recommended.*

Status 1
Power Charging
Under fluorescent lamp

Status 2
Power Charging
Exposure to daylight

Status 3
Power Charging
Exposure to direct sunlight

MECHANICAL OPERATION

1. Switch the power off
2. Lift up the crank handle
3. Wind the crank clockwise or counterclockwise for 1 to 2 minutes
4. Place the crank back after use

BATTERY PERFORMANCE

When fully charged the battery will provide light for approximately 80 minutes

BATTERY REPLACEMENT

1. Twist the cover of battery compartment counterclockwise by using a coin to open
2. Insert the battery into the compartment with the negative side downwards/positive upwards.
3. Place the cover back and tighten up with a coin

ATTENTION!

1. Do not store this product in places without a light source while the battery is installed
2. Switch off the torch when not in use
3. Avoid shining the light beam directly into peoples eyes
4. Protect the solar panel from hitting sharp or hard objects, avoid dropping on ground
5. Keep the solar panel clean for maximum efficiency
6. Keep winding steadily in the same direction to ensure an even charge
