

Lighthouse® elite LED Emergency Sensor Light

Product code:
L/H ESENSOR

Please read and follow the instructions carefully and retain for future reference.

Description

This multi-function lamp has many great features that make it perfect for use around the home and is ideal as an emergency lighting system, torch or floodlight.

Plugged into a power outlet the torch remains on charge ready for instant use, in the event of a power failure the Sensor Light will automatically switch on its LED floodlight, providing illumination and identifying its position should you wish to remove the light from its base charger and use it as a LED hand floodlight or LED torch.

The integral 120 degree motion sensor will activate the lamp when triggered by movement. Perfect for dark porches, halls, stairways or anywhere light is not required on a permanent basis. The Sensor Light provides visibility, added security and is energy saving.

WARNING!

- This light is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning the use of this product by a person responsible for their safety. Children should be supervised so that they do not play with the appliance.
- DO NOT use in outdoor environments.
- DO NOT immerse in any liquid or allow liquids to come into contact with the unit.
- DO NOT expose to extreme high or low temperatures.
- DO NOT shine directly into eyes.
- DO NOT look directly at the LED bulb.
- The performance of the sensor may be reduced in warm environments (eg close to radiators).
- This product is not a toy.
- The lens may become hot if used for prolonged periods of time.
- PIR operates effectively to a height of up to 1.5m.

Specifications

Voltage	230V AC, 50Hz, 2W	
Battery	Li-ion, 3.7V, 500mAh	
Brightness	Torch	2 x 0.5W LEDs - 50 Lumens
	Floodlight	16 LEDs - 30 Lumens
Lighting time	Torch	up to 1.5 hours,
	Floodlight	up to 2 hours (with fully charged battery)
Sensor	Duration 25 ±5 seconds, distance 2-3 metres	
Charging time	8-10 hours	
Size	130 x 63mm	

Operating instructions

Charging

Plug the Sensor Light into a wall socket. Charging begins immediately and stops automatically when the battery is fully charged after approximately 8 - 10 hours on initial charge.

Power Failure

If there is a power cut, the light will automatically turn on and remain illuminated for approximately 2 hours.

Motion Sensor

When dark, the light will illuminate if movement is sensed within the range of the PIR and will remain on for 25 seconds ±5 seconds.

Manual on/off

Once removed from the charging base the light can be operated by the on/off switch situated on the left hand side of the unit. Press this switch repeatedly to cycle the light to its desired function. Floodlight, Torch or Off. The unit will return to its normal automatic function once it is returned to the charger base.

Cleaning

Switch off and unplug the entire light and charger assembly from the wall socket before cleaning it. Clean the product using a soft, moist cloth using a mild detergent. Never use solvents or strong abrasive cleaning agents as these can damage the product.

Maintenance

All repairs should only be carried out by qualified service personnel. Do not open exterior casing of the light, as there are no user serviceable parts inside. Opening or visible attempts to open or repair the light may void any guarantee and/or cause damage to the product or personal injury. LED bulbs will never wear out under normal conditions and do not need to be replaced.
