

This versatile rechargeable inspection light features a SMD LED worklight that will provide either a powerful 600 lumen output floodlight or a bright 100 lumen spotlight.

The magnetic back and magnetic rotating handle allows the light to be attached to most metal surfaces and set at a convenient angle for the work in hand, the addition of two folding hanging hooks make this light ideal for use in many situations.

Battery Recharging

The Tech-Light 600 must be fully charged for a minimum of 4 hours before being used for the first time, this will ensure that the battery gives its best performance now and on future re-charging cycles.

Failure to recharge the light every 3 months may permanently damage or reduce the performance of the light.

The battery charge does not have to be fully depleted before recharging.

Using the Charging Adaptor

While on charge the small charging indicator lamp will glow red and will turn green when the battery is fully charged (approximately 4 hours).

The light can be charged from any USB regulated outlet such as a laptop or phone charger using the correct USB cable.

Please note the following

- 1) For best performance Li-ion batteries should not be stored for prolonged periods without being charged at regular intervals.
- 2) Manufacturers recommend keeping the battery in a state-of-charge of 40-50 percent when placing in storage. If in doubt, keep the light in a higher charged state in a cool place.
- 3) Self-discharge rate is approximately 10% per month.

Operating Instructions

The inspection light output functions are controlled by a sequential switch on the front of the light. Repeated switch operation will cycle between the worklight and spotlight output.

Under optimum conditions, with a full charge, the light can normally be used for 3 hours in worklight mode or 9 hours in spotlight mode.

To achieve the best performance from your Tech-Light 600, always switch the light off when the battery power begins to run low, and recharge immediately.

Cleaning

Clean the light using a soft cloth dampened with a soap and water solution.

Do not immerse or submerge the light in water or any other fluid.

Specifications

Mode	Worklight	Spotlight
Brightness	600 Lumens	100 Lumens
Run time	3 hours	10 hours
Light source	5W LED	1W LED
Battery	3.7v Li-ion 2500mAh	
Charge time	approx 4 hours	
Impact resistant	1 metre	
Weight	280g	
Dimensions	272 x 64 x 42mm	
Supplied with	USB cable	

Maintenance

The battery in this light can be removed and replaced at the end of its working life.

Replacement battery must be of the same size and type to ensure continued safe operation.

There are no other serviceable parts inside this light.

Opening or visible attempts to repair the light will void any guarantee.

LED bulbs should not wear out under normal conditions and do not need to be replaced.

Never attempt to open a battery, as liquid may be ejected, if accidental contact occurs flush the affected area with water. If the liquid comes into contact with the eyes flush with water and seek medical help. Liquid ejected from batteries may cause irritation or burns.

Li-ion batteries are formulated from environmentally sensitive materials and must be disposed of properly.

Please return these batteries to your local recycling centre where they will be recycled or disposed of properly.

Never attempt to incinerate batteries as they may leak or explode.

One-Year Home Use Limited Guarantee

Lighthouse guarantees this product to the original purchaser for a period of ONE YEAR against any defects in material or workmanship but shall not cover damage caused by misuse, abuse, alteration, or accident.

This product is intended for home use only and the guarantee will not cover products used for commercial purposes.
