

This versatile inspection torch utilises the latest technology in portable lighting, allowing an extremely bright light to be encased in a lightweight and slimline compact unit.

The powerful COB LED features two light settings:

- 800 Lumen Floodlight - Solid / Dimmable
- 150 Lumen Spotlight - Solid / Dimmable

A strong magnet in the base enables the wand to be fixed to metalwork. The cleverly designed pocket clip allows for the wand to be attached to clothing or a belt.

An ideal companion for use in all trades and around the home or car. The compact design makes it an ideal leisure torch offering minimal storage space and weight.

Specifications

Modes	Flood / Spot
Brightness	800 / 150 Lumens
Run time	Up to 10 hours
Light source	COB LED
Battery	3.7v rechargeable Li-ion
Charge time	approx 4 hours
Charge input	5V 1000mA
Water resistant	IP67
Weight	260g
Dimensions	414 x 52 x 48mm
Supplied with	USB charging lead

Battery Recharging

The wand must be fully charged for a minimum of 2 hours before being used for the first time, this will ensure that the battery gives its best performance now and on future re-charging cycles.

The charging cable is for recharging the battery only. It cannot be used to directly power the light.

Failure to recharge the light every 3 months may permanently damage or reduce the performance of the light. The battery charge does not have to be fully depleted before recharging.

Using the Charging Lead

Plug the USB charger lead into the micro USB charging socket at the rear of the torch. Plug the other end of the lead into any USB charging outlet.

While on charge the charging indicator lamp will glow red and will turn blue when the battery is fully charged (approximately 4 hours).

Please note the following

- 1) For best performance Li-ion batteries should not be stored for prolonged periods without being charged at regular intervals.
- 2) It is recommended to keep the battery in a state-of-charge of 40-50 percent when placing in storage. If in doubt, keep the light in a higher charged state in a cool place.
- 3) Self-discharge rate is approximately 10% per month.

Operating Instructions

The inspection light output functions are controlled by a sequential switch at the rear of the wand:

- Press and release the button to turn on the main floodlight.
- Press and release button again to turn on the spotlight.

The light has a dimmable function:

- The wand features a rotary dial at the rear. To dim the light output of either setting, rotate the dial anti-clockwise. To increase the light output of either setting, rotate the dial clockwise.

Under optimum conditions, with a full charge, the light can normally be used for 2 hours.

To achieve the best performance from your LED Rechargeable Inspection Wand, always switch the light off when the battery power begins to run low, and recharge immediately.

Water Submersible

The IP67 waterproof rating allows the light to be submersed in water for up to 10 minutes. The charging port must be fully sealed if submersed, failure to do so will allow ingress of water into the charging port and void any warranty.

Cleaning

Clean the light using a soft cloth dampened with a soap and water solution. Do not submerge the light in water or any other fluid for more than 10 minutes.

Maintenance

There are no serviceable parts inside this light. Opening or visible attempts to repair the light will void any guarantee.

LED bulbs should not wear out under normal conditions and do not need to be replaced.

Never attempt to open a battery, as liquid may be ejected, if accidental contact occurs flush the affected area with water. If the liquid comes into contact with the eyes flush with water and seek medical help. Liquid ejected from batteries may cause irritation or burns.

Li-ion batteries are formulated from environmentally sensitive materials and must be disposed of properly.

Please return these batteries to your local recycling centre where they will be recycled or disposed of properly.

Never attempt to incinerate batteries as they may leak or explode.

One-Year Home Use Limited Guarantee

Lighthouse guarantees this product to the original purchaser for a period of ONE YEAR against any defects in material or workmanship but shall not cover damage caused by misuse, abuse, alteration, or accident. This product is intended for home use only and the guarantee will not cover products used for commercial purposes.
